

A genuine double sensitisation or a pollen panallergy?

EUROLINE DPA-Dx* Pollen 1

Modern diagnostics for optimal therapy decisions

Differential diagnostics in a new dimension

- Identification of the allergy-causing proteins (e. g. rBet v 1, rPhl p 1, rPhl p 5)
- Differentiation between double sensitisations and cross reactions
- Targeted selection of suitable patients for a specific immunotherapy
- Improved prognosis about the therapy success

*Defined partial allergen diagnostics
