

CSF diagnostics.

Our portfolio for infections of the CNS

- Worldwide first commercial CE-marked CXCL13 ELISA for neuroborreliosis diagnostics: activity marker and therapy monitoring
- Standardised incubation scheme, efficient automation
- CSF dilution directly in MTP, minimum quantity of CSF required
- Quantitative results obtained by 4 to 6 point standard curve or recalibration, very good result reproducibility
- CSF/serum control pairs for all parameter available
- EUROLabCSF software – online transfer of measurement values, automatic calculation of AI; simple, accurate data transfer and evaluation

Product	Order number	Product	Order number
Anti-Borrelia plus VlsE-ELISA (IgG)	EI 2132-9601-L G	Anti-Measles Virus ELISA (IgG)*	EI 2610-9601-L G
Anti-Borrelia CSF ELISA 2.0 (IgM)	EI 2132-9601-2L M	Anti-Mumps Virus ELISA (IgG)	EI 2630-9601-L G
Anti-CMV-ELISA (IgG)	EI 2570-9601-L G	Anti-Rubella Virus ELISA (IgG)*	EI 2590-9601-L G
Anti-EBV-CA-ELISA (IgG)	EI 2791-9601-L G	Anti-Toxoplasma gondii ELISA (IgG)	EI 2410-9601-L G
Anti-TBE Virus CSF ELISA 2.0 (IgG)	EI 2661-9601-2L G	Anti-Treponema pallidum ELISA (IgG)	EI 2111-9601-L G
Anti-TBE Virus CSF ELISA 2.0 (IgM)	EI 2661-9601-2L M	Anti-VZV ELISA (IgG)*	EI 2650-9601-L G
Anti-HSV-1/2 Pool ELISA (IgG)*	EI 2531-9601-1 L G	CXCL13 ELISA	EQ 6811-9601-L

* Test kit contains additional, optional calibrators
