Stress diagnostics made easy with EUROIMMUN saliva tests

ELISAs for determination of stress indicators

Cortisol
Indicator of activity of hypothalamus/pituitary gland/adrenal gland axis

sIgA
Marker for determining the immune status and risk of respiratory tract infections

Alpha amylase
Indicator of changes in the sympathetic nervous system

- Simple test performance in a few steps
- Fully automatable

Advantages of saliva diagnostics
- Painless and stress-free sample withdrawal
- Patient-friendly determination of time profiles (monitoring)
- Optimal for large study panels (screening)
