

EUROArray HPV (IVD)

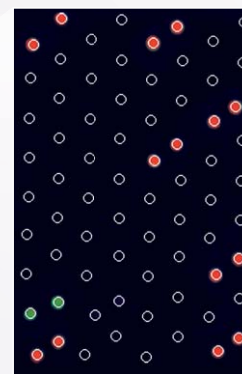

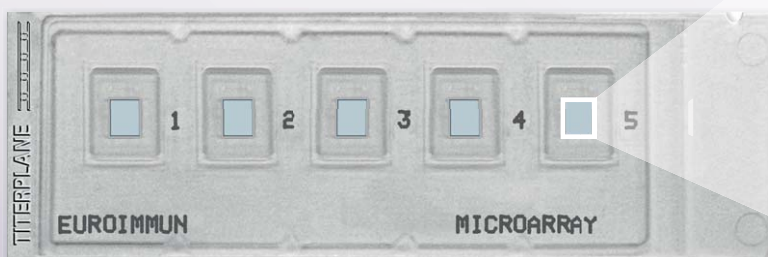

Detection and typing of all relevant human papillomaviruses in one reaction

Fulfills criteria for primary cervical cancer screening according to Meijer et al.

- **Complete detection and typing of all 30 relevant anogenital human papillomavirus subtypes**
- **Detection of the viral oncogenes E6/E7 – highest possible sensitivity during each stage of the viral life cycle**
- **Significant results even in the very early stages of infection**
- **Distinction between high-risk and low-risk types of HPV**
- **Reliable identification of each single agent of a multiple infection**

EUROArray HPV (order no. MN 2540-####)

####: For detailed information about available test kit formats see our product catalogue or visit www.euroimmun.com

- **Comprehensive multiplex testing**
- **Fully automated evaluation**
- **Integrated controls for all work steps**
- **Simple procedure – just one PCR, ready-to-use reagents**
- **User-friendly EUROArray technology**
